

# ART AND SCIENCE

Hallet Oak Gallery  
[www.halletoakgallery.com](http://www.halletoakgallery.com)

Animals live in habitats that have things they need to survive. Choose an animal and draw the animal in one of its habitats. In your art work include what the habitat is like and where the animal might be during the day or night. This could be in the woods, lakes, ocean, in a tree or on the grass, or close to rocks for example. Maybe the weather is hot like a desert or cold with snow. Also include what the animal would eat or where they would get water. **Make your drawing colorful!**
